

## Project Update

# Bidwell Park Renovation

A master plan for the renovation of Bidwell Park began in the summer of 2019 with a series of community workshops. The community supported the design to convert the former classroom buildings into a community center, an expanded children's play area, walking paths, sport courts, picnic tables and an expansive multi-use lawn. Renovation of Bidwell Park will occur in two phases:

**PHASE 1:** Demolition of the classroom building in the Park interior to occur **in late-September 2022**. Demolition shall be completed by mid-November 2022.

**PHASE 2:** Construction of the park and community center are anticipated to begin in late 2023. Construction documents are in progress.

During PHASE 1 Demolition, portions of Bidwell Park shall remain open, including the childrens playground and sport fields. The Hayward Area Recreation and Park District apologies for any inconvenience.
